DevOps: Myth vs. Reality

80% say they do DevOps, but is it working?

3 Reasons It Fails:

1. **Culture Clash:** Tools aren't enough. Siloed teams (dev, test, ops) hinder ownership.
2. **Missing Skills:** Teams lack technical know-how to fully embrace DevOps.
3. **Blind Spots:** Data's not clear. KPIs don't show real impact on speed, cost, or quality.

DevOps Dream

Speed

Efficiency

Collaboration

Streamlined workflows, faster delivery, improved quality, and lower costs.

DevOps Reality (Why it fails)

Broken Processes

Silos

Lack of Data

Siloed teams, missing skills, unclear KPIs, leading to slow delivery, high costs, and frustrated teams.
